adding value to your people!

ABOUT US

NUARB Training Academy is a new concept that offers a wide range of courses covering a variety of key disciplines needed in the aerospace industry. We provide maximum flexibility by adapting to the customer's main activity and technology.

APPLICATION BASED METHODS

- focused on field applications
- focused on methodology not only on software versatility

TRAINERS WITH FIELD EXPERIENCE

- Only aerospace engineers with field experience as trainers.
- Trainers are acting also as design/ stress engineers on real projects.
- Our trainers are committed to performance and quality.

HOW IT WORKS

OUR CONCEPT

- We are creating job skills not only software versatility.
- Students become familiar with engineering tasks and how to solve them using dedicated software.
 - Students learn how to deal to real problems not only to handle a tool.
 - Students become aware of risks in case of ignoring methodologies.

WHAT DO WE OFFER

Aerospace trainings

- Aircraft components & systems
- Commercial aircraft structure
- Manufacturing processes in Aerospace Industry

Design methodology

- CAD Software (CATIA V5, UG)
- Composite
- Sheet Metal
- Welding
- Machining
- Jigs & Tools

Simulation

- FEA Methods
- Hand calculation
- Static/ Dynamic/ Fatigue Analysis

System Trainings

- Project Management
- Quality and Information Management
- Team Leaders
